DETAILED ACTION

1. Claims 1-44 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The use of a doped silica soot preform, an at least partially sintered "moat" or barrier layer that prevents fluorine from diffusing or migrating from the second portion containing dopant when applied onto the first portion and subsequently stripping the dopant from the second region are critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

2. Claims 1-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dabby (6,474,107) in view of Kanamori et al (5,556,442) and Andrejco (4,812,153).

The claims are rejected for the reasons given in the First Office Action, mailed 9/29/2003.

3. Applicant's arguments have been considered but are deemed unpersuasive of patentability.

It is urged in regard to the 35USC112, paragraph rejection that the present invention does not require sintering or that a barrier layer is formed since it merely exemplary. It is noted that it is the only disclosure and should be reflected in the claims.

In regard to the rejection over the prior art:

It is urged that Dabby sinters in the presence of fluorine. This is an incomplete characterization of Dabby. Figure 6 shows that sintering of the soot cladding at step 98 is performed in a non-fluorine environment. Some fluorine dopant would be expected to leach out. It is also argued that Dabby does not disclose a "moat" which Applicant

Art Unit: 1731

characterizes as a "depressed structure". There appears to be no support for the term "depressed structure". In any case the "moat" reads on the fire polished layer or one of the soot cladding layer absent further physical or chemical definition of the "moat" layer.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

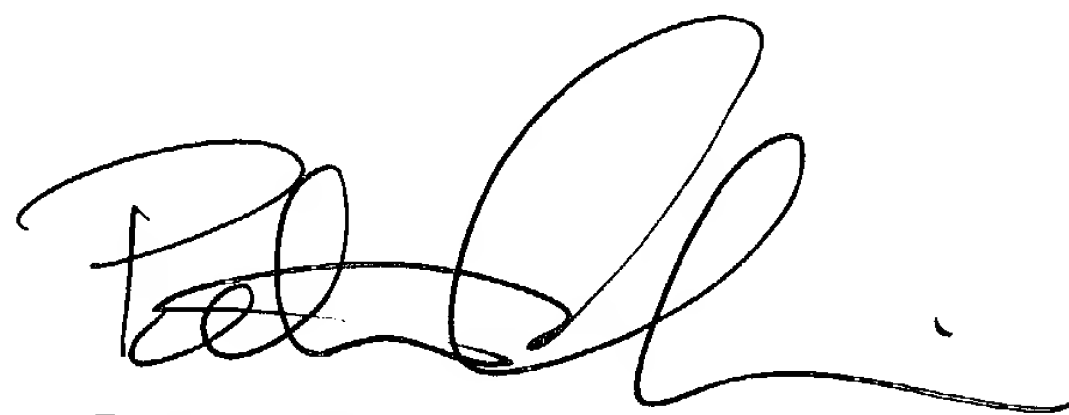

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
